## 新版Pycharm中Matplotlib图像不在弹出独立的显示窗口

## 官方说明链接:

https://intellij-support.jetbrains.com/hc/en-us/community/posts/115000736584-SciView-in-PyCharm-2017-3-reduces-functionality-of-Matplotlib

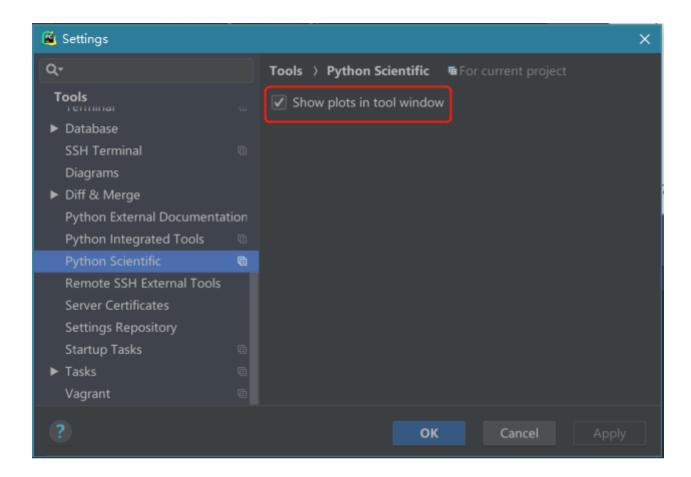

pycharm从2017.3版之后,将 matplotlib 的绘图的结果默认显示在 SciView 窗口中, 而不是 弹出独立的窗口, 如图

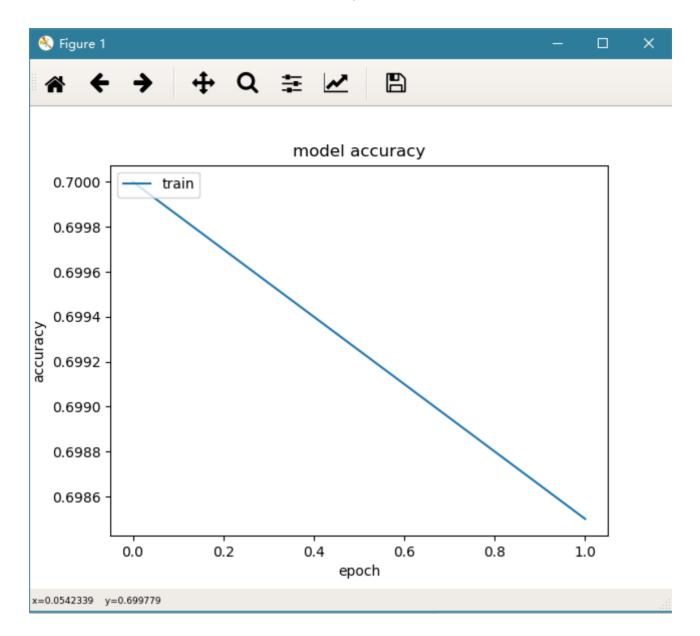

如果不喜欢这种设置,可以通过如下方式修改,弹出独立窗口

File | Settings | Tools | Python Scientific | Show plots in toolwindow

## 如图,取消勾选

此时,在执行就会在独立的窗口中弹出 Matplotlib 绘图

## 补充(2019.04.29):

测试平台及版本(使用上述方法work)

- windows10 x64 专业版
- Anaconda3-5.2
- PyCharm2018.1.4 & PyCharm2019.1.1(当前最新)

可能遇到的问题

配置最新版PyCharm2019.1.1弹出matplotlib窗口时, 依赖的PyQt5,作者遇到了下面的错误

File "D:\ProSoft\PyCharm2019.1.1\helpers\pydev\pydev\_ipython\inputhookqt5.py", line 25, in

from PyQt5 import QtCore, QtGui

File

"D:\ProSoft\PyCharm2019.1.1\helpers\pydev pydev bundle\pydev import hook.py",

line 21, in do import

module = self.\_system\_import(name, \*args, \*\*kwargs)

ImportError: DLL load failed: 找不到指定的程序。

问题分析: PyQt5安装不合适, DLL文件找不到

解决方案: pip install PyQt5
